MariaDB verification instructions

Created by Eric Remington on Jul 29, 2014

1. There are 2 methods to determine if MariaDb is installed on your system. Method 'a' also validates functionality.
   a. **Method 1 using mysql command line utility**

      $ *mysql -h localhost -u root -p*

      Enter password:

      Welcome to the MariaDB monitor. Commands end with ; or \g.

      Your MariaDB connection id is 23

      Server version: 5.5.38-MariaDB MariaDB Server

      Copyright (c) 2000, 2014, Oracle, Monty Program Ab and others.

      Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

      MariaDB [(none)]>
   b. **Method 2 using rpm (if your linux uses rpm)**

      $ *rpm -qa | grep -i mariadb*

      MariaDB-common-5.5.38-1.el6.i686

      MariaDB-server-5.5.38-1.el6.i686

      MariaDB-client-5.5.38-1.el6.i686

      MariaDB-compat-5.5.38-1.el6.i686
      $
